## CENTRAL MACHINERY SALES AFS SERVICE

### FLEET MANAGEMENT

Fleet management allows you to track all of your machines and, by extension, your team, from a single Web page, so you can:

- Accurately pinpoint the exact location of a given machine
- Coordinate machine logistics so you can efficiently manage maintenance refueling and other needs to keep your people productive and machines running smoothly

### SECURITY AND ASSET TRACKING

Protect your investment and streamline maintenance by using the AFS Connect Manager™ alerts and antitheft system (where available). Geo-fencing ensures a machine stays within certain coordinates preset by you. Curfew management sends an alert if a machine is started after working hours.

### AFS CERTIFIED DEALERS

Our AFS Certified dealers have the experience to help you manage your AFS precision farming technology to maximize yields, minimize input costs and improve your bottom line, with dedicated AFS professionals on staff. In addition, Case IH product and AFS specialists work alongside your dealer to assist you before, during and after the sale. Your AFS Certified dealer is focused on one thing—helping you BE Ready.

Your dealer will be there for years to come, backing up your equipment with expertise, support and service. His investments in training, people and technology provide the expertise and support required to meet your technology needs. Your AFS Certified Dealer is one more way Case IH offers you the capability to optimize your farm with the help of people you trust.
